HAP stacked HESS I + II + Iu analysis: Spectrum
FB template analysis with 3D background model: HESS Iu template, std ImPACT

Legend:
- HAP diff. flux points: HESS I + II + Iu data
- Syst. uncertainty from high latitude runs
- Syst. uncertainty from reflected FB runs

Y-axis: $E^2 \frac{dN}{dE} \left[\frac{TeV}{cm^2\,s\,sr} \right]$

X-axis: $Energy\,[TeV]$
